

## Summer helpful hints

When the weather gets hot, saving energy makes a big difference.  
**Here are the top 9 ways to save on your summer energy bill.**

**Setting air conditioning  
1 degree warmer**  
saves 10 per cent more energy

**Replace 10 halogen  
downlights with LED lighting**  
to increase energy efficiency

**Focus on cooling one  
part of your house**  
and cut down in other areas

**Using the dryer one less time  
a week and regularly washing  
laundry in cold water** saves  
\$120 a year

**Turn off appliances at the  
wall when not in use**  
– this can save you 5 per cent on  
your energy bill

**Draught-proof your home  
to keep heat out** and save  
around \$75 a year

**Hang out in shared  
air-conditioned spaces**  
– at the office, shopping centre  
or cinema

**Turn off your second fridge**  
to save \$250 a year

**Turn off your pool pump at  
peak times** – 3pm -7pm and  
turn off your pool heater on  
hot days
