

Energy Saver

Building the business case

Learn how to sell your energy efficiency project to senior management

Identifying energy efficiency projects is the first step to reducing business costs and increasing productivity. This course will help you take the next steps to plan, develop and communicate your project.

What will you learn about?

Delivered by an energy advisor, this practical half-day workshop will help you improve the success rate of your business case. You will learn how to identify and involve key stakeholders, select and apply the most effective financial analysis methodologies to demonstrate financial value of the project, promote the benefits of the project and manage project risks.

Course benefits

After the course, participants will be eligible to receive up to 15 hours of one-on-one coaching from an energy advisor to implement energy efficiency opportunities specific to your business for a cost of up to \$300.
